

Spring Driving Tips

Spring is here – and that means POTHOLE! At Rudy Schmid Body & Frame, we can take care of your vehicle’s suspension after an unhappy meeting with a pothole!

- Because of April showers, roads may be wet and if the temps drop a little, they will be slick and possibly have black ice – be careful!
- Watch for puddles that may be hiding potholes – and slow down so you don’t splash pedestrians!
- Quickly changing spring temperatures can create fog and mist, which lead to reduced visibility.
- If it’s raining, don’t forget to turn on your headlights when you turn on your wipers!
- And the bottom line is that many drivers simply aren't as careful as they are when there's snow on the ground. This is when common sense can save a life: Drive at a reasonable speed and don't assume that just because the temperature is warmer, that the roads are any safer.
- Spring is the perfect time to get your vehicle RustChecked [\[link to RustCheck page on RS site\]](#) – give us a call and set up an appointment!
